EDUCATION

Saigon University (SGU)

B.S. in Software Engineering

Aug. 2023 – Sep. 2028 (Expected)

GPA: 2.65/4.0

COURSEWORK

Courses: Python Programming, Databases

SKILLS

Languages: Python, Rust, Lua, PHP, Bash

Frameworks & Libraries: Extensive Python Ecosystem (Web, Data Analysis, AI), FastAPI, ReactJS

Tools & Technologies: Git, Podman, Kubernetes, Linux, Neovim, Claude Code, Ollama, OpenClaw

PROJECTS

Market-Reaper | *FastAPI, Podman, Kubernetes, Bash, ReactJS, Ollama, OpenClaw*

- Engineered a dynamically scalable, node-based local bot agent system, optimizing performance based on available hardware resources.
- Developed automated data ingestion pipelines for web scraping and API integrations to monitor real-time stock market data and extract financial reports.
- Integrated AI models (Ollama, OpenClaw) to process and analyze financial datasets, generating highly accurate market trend predictions and trading scenarios.
